

ES IMPORTANTE QUE RECUERDES:

• Las vacunas pueden ocasionar efectos secundarios transitorios, como aumento de temperatura (fiebre), de volumen, enrojecimiento de la piel y dolor en el sitio de punción.

• Los efectos secundarios pueden aparecer a las pocas horas e incluso hasta una semana posterior a la colocación de la vacuna.

INDICACIONES:

- La persona vacunada debe ingerir abundante líquido.
- Coloque compresas frías (no congeladas) en la zona de punción para ayudar a aliviar el dolor que pudiese presentar.
- En caso de fiebre (temperatura superior a 37,5 °C), administrar antipirético recomendado por su médico tratante.
